The Charles William Neumoyer Collection

In presenting the Charles William Neumoyer Collection of Monies of the World for Public Sale, we would like to make a few remarks about the Collection and the man who formed it. Stack's has been handling coins at Auction for many years. In our experience we have seldom had the pleasure of devoting an entire Sale, of four sessions, to one Collection formed by a single individual. Mr. Neumoyer devoted over 50 years to the formation of this comprehensive group of coins and currency that so accurately reflects his broad interest in the history of the various circulating media used by mankind from the first crude beginnings to the present day. He represents a type of Collector that can well stand as example to others of the fraternity of Numismatists. Certainly few men have enjoyed their collecting careers more than Mr. Neumoyer. Starting at the ripe age of 14, he broadened his interest as the years rolled on. The joy of acquisition went hand in hand with the satisfaction he gained from his research into the historical background of the variety of coins he gathered together. He now feels that others should have the opportunity to benefit from his experience. We hope that there will be many who will benefit both from his example and the collecting standard he has set.

It is difficult to comment on a Collection as broad as this one without making what might be considered invidious distinctions. Nevertheless we will attempt to pass lightly over the whole, emphasizing a few of the highlights. In the Ancient field the selection of Greek and Roman gold is particularly choice. The Staters of Lydia and the Darics of Persia are represented by some nice specimens, as are the later Greek pieces. Among the latter is a particularly charming one - twelve Stater of Cyrene. This coin had an exciting time before it finally came into Mr. Neumoyer's hands. Sent from England during the War, on a ship that was torpedoed, it was later recovered from the Channel when the Purser's safe was raised from the wreck. There are also some very attractive Aureii of Imperial Rome. The coins of the Bible are particularly well represented. This group also includes coins of Ancient Judea, with the Shekel and Half Shekel of the First Revolt starring as particularly fine specimens. You will also find many Greek silver coins that reflect the owners high standard of taste.

The Medieval period is introduced by a group of Byzantine Solidi. These pieces are supported by some excellent examples of hammered gold of various Continental States. Medieval silver is not neglected, with many choice examples of Deniers and early pennies to show the type of coin that was typical of the era.

As an American, Mr. Neumoyer naturally reflected an interest in the coins of our own country. He laid an excellent foundation for the Federal issues with a comprehensive run of the various coins that were used in the American Colonies before the Revolution, as well as a fine lot of Colonial Notes. We feel that this aspect of the Numismatic history of the United States is too frequently neglected by the average Collector today. The Silver and minor coins are well represented by a broad group of the early pieces in various conditions. There is also a particularly interesting group of one cent patterns numbering more than 60 pieces. The group of \$2.50, \$5.00 and \$10.00 gold is well worth the attention of specialists in U. S. Gold coins. Broken Banknotes and fractional notes exemplify the rather chaotic currency conditions that prevailed before the Civil War. This material is followed by a really superb type set of U. S. paper money including Fractional currency in choice condition. Those interested in Tokens will find an exceptionally interesting selection of Bunktowns, Tory Cents, Hard Times and Civil War Tokens, and Merchants Store Cards.

In closing we wish to say that we regard Mr. Neumoyer as one of the finest collectors we have known in some time. We hope that the dispersal of his Collection will serve as an inspiration and a guide to current and future generations of coin enthusiasts.

UNITED STATES HALF DIMES

CATALOGUERS NOTE: It is with a great deal of pride and pleasure that we offer the following virtually complete set (lacks only the 1802) of Half Dimes. Many of the coins offered here are being offered for the first time in thirty to forty years. They have not been cleaned or doctored in any way, and in most cases are in a beautiful steel-blue toned state of preservation. Only in recent years has it become apparent how rare many of these dates and mints are. It is the wise collector who takes this fact into consideration when bidding. Many of these coins are quite suitable for the "type" collector, especially those who are seeking the utmost in quality.

- 1125 **1792 HALF DISME.** The Half Disme is the first official coin of the United States Mint. Portrait left, supposed to be that of Martha Washington, date below. LIB(erty), PAR.(ent) of SCIENCE & INDUSTRY. Rv. Small flying eagle. HALF DISME in two lines below; legend, UNITED STATES OF AMERICA. Milled edge The coin offered here is a sharp Very Fine, bordering on Extremely Fine. It has a minute dent on the reverse, across the beak of the eagle, but it does not mar the appearance of the coin. Very Rare, and as much a part of American History as the Declaration of Independence. In view of the demand for rare coins today, this will probably set a new record price. Conservatively estimated at \$350.00. **PLATE**
- 1126 **1792 Half Disme.** Duplicate of preceding lot, only strictly Fine and choice. Has a few small scratches on obverse field, and also on eagle's breast. It is rare when one of these early mint issues is offered for sale, and here we have two specimens offered in one sale. Mr. Neumoyer indicated that these coins had a special place in his heart. This coin will probably realize \$250.00, not being as choice as the preceding lot.
- 1127 **1794** First Year of regular Issue. Strictly Fine. Surface of coin slightly rough. Rare.
- 1128 **1795 Uncirculated.** Unquestionably in the "Gem" class. Without the usual mint adjustment marks. Die break over TY and first Star on obverse. Beautiful blue-gold color. **PLATE**
- 1129 **1795 Uncirculated.** A choice coin but has several initials scratched on the obverse which naturally impairs the value. An excellent "space-filler".
- 1130 **1795** Fine. Nice even wear. Very desirable specimen for the collector that does not want the ultimate quality.
- 1131 **1796 LIKERTY.** Very rare variety discovered in recent years. Unpriced in the Guidebook. Strictly Fine, choice. Pleasant even wear, no impairments. **PLATE**
- 1132 **1797 Fifteen Stars.** About Uncirculated. Very choice and above average. We have seen similar specimens offered as Uncirculated, which should give you some idea of how nice this coin actually is. **PLATE**
- 1133 **1797 Fifteen Stars.** Extremely Fine. Duplicate of above but not as choice. Still very desirable.
- 1134 **1797 Fifteen Stars.** Very Good. Was bent and straightened at one time.
- 1135 **1797 Sixteen Stars.** Uncirculated. Another "Gem". Without adjustment marks. This coin will probably bring a "runaway" price. It certainly warrants it. **PLATE**
- 1136 **1797 Sixteen Stars.** Fine, choice. A very desirable coin, particularly for the "type" collector.
- 1137 **1800 Uncirculated.** Just about "Gem" grade. Die break at edge below date. Beautiful steel color. Should be worth \$250.00 today. **PLATE**
- 1138 **1800 Extremely Fine.** A few nicks in field, from mishandling, takes this out of the Uncirculated grade. Shows no wear, hair very sharp.
- 1139 **1800** Very Fine, choice. These coins are desirable in any condition, particularly so this nice.

U. S. DIMES

- 1191 **1796 First Year of Issue. 5 Berries.** Diagnostic die break at first Star. A lustrous iridescent Very Fine example. Nicely centered, a bit weak above LIBERTY. Almost full denticles visible on obverse and reverse. Reverse has some adjustment marks. A most desirable coin. In great demand. Should realize \$300.00. **PLATE**

"SO-CALLED DOLLARS"

Exposition and Commemorative Medals

Toward the end of the 19th Century, several dealers and collectors had begun to use the term "so-called Dollars". This term developed and grew in importance until today where this specialized series has an independent status.

The items offered here consist mainly of Exposition or Commemorative medals of dollar or near-dollar size, and the monetary so-called dollars. Serious collectors of this fascinating series are referred to Vol. 20, No. 4 of the Coin Collectors Journal, published July/August, 1953, where the late numismatist Richard Kenney prepared an extensive system for collecting. His reference numbers are preceded by "K", which we use to better identify the following lots.

U. S. QUARTER EAGLES (\$2.50 GOLD)

RARE 1796 NO STARS

- 2348 **1796 No Stars on obverse.** Designed by Robert Scott. The only year of this type. Very Fine obverse, Extremely Fine, mint lustre on reverse. A rare type coin. Only when large and important collections are offered does a rarity such as this come to light. For many years the series of Early Quarter Eagles was seriously neglected. Numismatists who have taken the time and effort to check mint records and past auction sale offerings have come to realize the rarity of this series. Added emphasis occurred with the advent of type collectors who have virtually exhausted the few existing specimens. We feel this coin will realize in excess of \$1,500.00. **PLATE**
- 2349 **1802/1.** This nice specimen falls a little short of Extremely Fine. A very appealing coin. Some faint suggestion of mint lustre. Worth \$450.00. **PLATE**
- 2350 **1802/1.** Another as above. Strictly Very Fine. Perfectly centered. Easily worth a \$400.00 bid.
- 2351 **1802/1.** A third specimen. Strictly Very Fine, as above. Almost a perfect match to the preceding lot. Three specimens of this rare variety do not make the coin common. The duplication serves to give more than one interested collector a chance to acquire an example of a type seldom seen on the market today.
- 2352 **1804** A shade from Uncirculated. Proof-like. Unfortunately this coin has the number "10" faintly scratched in the field before the face. This minor defect blends in with deep yellow and copper toning so its presence is minimized. Still worth \$400.00. **PLATE**
- 2353 **1804** A second of this date. Very Fine, with some claims to Extremely Fine. A trifle weak on obverse and correspondingly on the reverse due to a planchet adjustment. Worth the same as the preceding lot.
- 2354 **1804** A third of this date. Fine to Very Fine, with a small edge dent. A nicely balanced coin, worth \$300.00. We believe our estimate to be conservative as the demand for these early coins can never be satisfied.
- 2355 **1804** A fourth. Almost impossible to believe that one collection could have 4 early Quarter Eagles of the same date. Very Fine, with a semi-circular depression on the obverse, perhaps caused by the die hitting the coin twice. A few minor scratches before the face. Should realize \$275.00 or more.
- 2356 **1805** Extremely Fine, and one of the most difficult to obtain. Only 1,781 coins were struck and a mere fraction still survive. Worth \$400.00.
- 2357 **1805** Another of these rare coins. Extremely Fine, red-gold iridescence. This collection affords the collector the opportunity of a "second chance" on many of these "hard to locate" coins. Take advantage and bid liberally.
- 2358 **1807** The last year of this type; and the "commonest" date, if any can be called "common". Extremely Fine, with two small edge dings. Should realize \$425.00. **PLATE**
- 2359 **1807** A second of this date. Very Fine. Nicely centered, and generally well struck. Worth a \$400.00 bid. The large number of the rare Quarter Eagles offered here may be surprising to those collectors who have suffered the usual difficulty in locating acceptable specimens in the past. The quantity can be explained by the fact that Mr. Neumoyer was very much attracted by the coin and bought duplicates in the course of attempting to acquire the best specimens.

THE EXCESSIVELY RARE 1808 QUARTER EAGLE

- 2360 1808 Turban Head or Round Cap design. Designed by John Reich. This and the 1796 no stars are the only two coins that were struck in only one year. Brilliant Uncirculated, weakly struck about the edges as all are. No doubt, **ONE OF THE FINEST KNOWN**. We do not recall ever handling a superior specimen. We have spent, at various times months on end trying to locate an 1808 in any condition for customers want lists. We know how rare and difficult it is to find. This specimen is almost in unique condition. We feel in estimating this coin for \$2,500.00 that we are definitely being conservative, and we would not be surprised if it goes much higher. **PLATE**
- 2361 1829 Turban Head. Designed by William Kneass. The first year of this type and a very scarce coin. About Uncirculated, choice. For some inexplicable reason this specimen is always underestimated in reference books. In our opinion the coins of this design are just as rare as the earlier types for they appear in Auction Sales as infrequently as the type from 1796-1807. Worth \$400.00. **PLATE**
- 2362 1830 Extremely Fine. Same type as above. Very scarce and worth \$400.00. **PLATE**
- 2363 1831 Another of this type. Just a shade from being an Uncirculated coin. Full frosty mint lustre, with some Proof-surface. Easily a \$375.00 coin. **PLATE**
- 2364 1832 About Uncirculated. Choice. Sharply struck. Each star clearly defined. High, even edge. Just as valuable as the preceding lot. **PLATE**
- 2365 1833 Extremely Fine. Mint lustre. Though valued equally with the others of this type (1829-34), it seems to appear less frequently. Collectors should take cognizance of our remarks on the value of the entire group of these early coins. **PLATE**
- 2366 1834 The new design. Without Motto. Brilliant Uncirculated. Proof-surface. Worth \$50.00 so choice.
- 2367 1835 Extremely Fine.

COMPLETE SET OF PANAMA-PACIFIC COINS IN ORIGINAL FRAME

- 2745 1915 Complete Panama Pacific set, consisting of two Fifty Dollar Gold pieces, round and octagonal; \$2.50 and \$1.00 in gold, and the Half Dollar in silver. In the original copper frame as it came from the Exposition.

The Panama Pacific Exposition was held in San Francisco, in celebration of the construction and opening of the Panama Canal from February 20th to December 4th, 1915. It was one of the largest expositions ever held in the United States and attracted world wide attention. Forty-four States, United States Territories, and thirty-six foreign nations were represented. The coins struck in connection with the exposition are among the most interesting of the United States Commemorative issues.

These were the first Fifty Dollar gold coins to be issued under the authority of the United States government. Approximately 1500 sets were struck, although only 483 sets were sold at the Exposition. The balance of the issue was remelted. We doubt if more than half of the issue sold still exist, making it quite rare. This is probably the most popular and sought after set of coins in the market today. These sets were originally sold for \$200.00 back in 1915. They have steadily increased in value, to a point today, where they are quoted at \$5,000.00. In fact, we recently sold a set in an original plush and leather box at Public Auction for \$4,850.00. It would not surprise us to see this superb Uncirculated set bring \$5,000.00. It is an excellent investment that certainly never loses its value. Past history has proven this fact.

EXTREMELY RARE TEN DOLLAR INTEREST BEARING NOTE

Quote Friedberg: "The Interest Bearing Notes are the rarest of all issues of American Currency. Even advanced collectors after many years of ardent search will not have had the pleasure of seeing one of these notes. Such rarity is only natural for these notes, and applies as well to all three types of American Currency which bear interest; the Compound Interest Treasury Notes, the Refunding Certificates (see following lot) and these Interest Bearing Notes. When one considers the perilous state of the nation in those years (1863-1865), the scarcity of money and the general fear, it was a rare person indeed who did not turn in his interest bearing money the moment it became due and payable. That is why so few of these exist today—".

- 2799 **March 23, 1864.** Interest Bearing Note. \$10.00 with interest at 5% for one year. FR. 196. Obverse: Bust of Chase left; female looking downward, right. Large heraldic eagle to center. Issuance date, seal and serial number printed in red. Surcharged in green through center design. The note offered here is perhaps the finest known. Is far superior to the specimen illustrated in Friedberg's book and which is now on display in the Chase Money Museum. We grade it conservatively at Very Fine, choice, almost Extremely Fine and, as such, is worthy of a home in the finest collection of United States Paper Money. We are estimating the value of this note at \$1,000.00 although it would not surprise us if it went higher.

EXTREMELY RARE TEN DOLLAR REFUNDING CERTIFICATE

- 2800 **April 1st, 1879.** \$10.00. Refunding Certificate. FR. 214. Signed by Scofield and Gilfillan as all are. This unusual note bore interest at 4% per annum and has a present day redemption value of \$21.30. This is one of the most popular and sought after notes in the entire series. Obverse: Bust of Franklin, left; Red seal at center. Date of issuance printed in bright red. Reverse: Table of interest values for the particular note. While not quite as rare as the preceding Interest Bearing Note its popularity has made it quite difficult to acquire. This Very Fine condition note should realize about \$400.00 based upon recent offerings, although it could conceivably go higher. This is a rare opportunity to acquire a rare "type" note.
